PROJECTS

Explainable AI–Driven Survival Prediction and Risk Stratification in Heart Failure

Python | Scikit-Learn | LightGBM | XGBoost | SHAP | Git

- Benchmarked nine machine learning classification models on a clinical cohort of 299 heart failure patients from the UCI repository to optimize risk-stratification accuracy.
- Implemented post-hoc Explainable AI (XAI) using global and local SHAP value frameworks grounded in cooperative game theory to map non-linear risk attributions of key clinical features

Chronic Disease Surveillance Pipeline for Orleans Parish

R | SQL | SQLite | Bash | Unix | GitHub | Power BI

- Automated data cleaning, SQL cohort analysis, and statistical summaries from raw health datasets.
- Integrated Unix data processing, database querying, and R scripting into a single executable workflow.
- Delivered population health insights through automated reports and visualization dashboards.

Orleans Parish Socioeconomic Trend Visualization Shiny-app

R | Shiny | tidycensus | ggplot2 | Git

- Constructed a longitudinal census tract–level panel dataset (2016–2023) using the U.S. Census ACS 5-year estimates via the Census API.
 - Conducted feature engineering on demographic and socioeconomic indicators, computed means across 2016–2023.
 - Designed and deployed an interactive R Shiny dashboard to visualize longitudinal socioeconomic trends (2016–2023), with a publicly accessible app and fully reproducible codebase on GitHub.
-

WORK EXPERIENCE

Tulane University Violence Prevention Institute

Graduate Research Assistant

New Orleans, LA

October 2025 – Present

- Conduct data cleaning, feature engineering, geospatial mapping, descriptive and inferential statistical data analysis for violence-related longitudinal studies conducted as part of the E2E and SHIFT projects.

Tulane University Department of Biostatistics and Data Science

Graduate Teaching Assistant - SPHL 6050 (Biostatistics for Public Health)

New Orleans, LA

August 2026 – Present

- Conduct TA hours to assist students with the topics covered and grade assignments associated with coursework
-

EDUCATION

Tulane University Celia Scott Weatherhead School of Public Health and Tropical Medicine

Master of Public Health in Biostatistics (Elective focus in Data Science), GPA 4.0

New Orleans, LA

May 2027

- Honors: 1912 Founders Scholar
- Relevant Coursework: Statistical Inference I&II, Statistical Learning in Data Science, Introduction to methods in Data Science (Unix/Linux Operating Systems, Git Bash, Python, R studio, SQL), Data Management and Statistical Analysis, Database Management, Intermediate Biostatistics, Categorical Data Analysis, Design of Experiments, Regression Analysis, Epidemiology

Addis Ababa University

Bachelor of Science in Diagnostic Medical Imaging, GPA 3.86

Addis Ababa, Ethiopia

July 2022

- Honors: First Class Honors
 - Relevant Coursework: Radiologic Physics, Radiologic Equipment, Radiologic Anatomy, Radiologic Pathology, Medical Ultrasonography, Computed Tomography and Magnetic Resonance Imaging
-

SKILLS AND CERTIFICATIONS

Languages: English (Full Professional), Amharic (Native)

Technical Skills: Python Ecosystem (PyTorch, Scikit-Learn, LightGBM, XGBoost, SHAP, LIME, Pandas, NumPy, SciPy, Matplotlib, Seaborn, Jupyter Notebook), Statistical Computing in R (Tidyverse, dplyr, ggplot2, Survival, Survminer, Lme4, Tidymodels, Shapr, R Shiny, Tidycensus, R Markdown), Linux/Unix Operating Systems, Bash Shell Scripting, Git Version Control System, SQL,

Soft Skills: Problem Solving, Analytic Thinking, Technical Communication, Leadership, Cross-functional Collaboration

Certifications: CITI IRB Responsible Conduct of Research (RCR) – Biomedical & Social and Behavioral

Louisiana Clinical and Translational Science Center – Level I, II & III Clinical Research Coordinator

PRESENTATIONS

Annual Tulane Research, Innovation, and Creativity Summit (TRICS 2026)

April 2026

Machine Learning–Driven Survival Prediction and Risk Stratification in Heart Failure

<https://event.fourwaves.com/trics2026/participants/afe5e1c6-31f5-49f0-bf1b-b5cb0b94b709>

EXTRACURRICULAR ACTIVITY

Event Assistant | LA CaTS Annual Coordinator Training | Tulane Center for Clinical Research January 2026 – Present

PUBLICATIONS

“Development and External Validation of Explainable Artificial Intelligence Models for Cardiovascular Disease Prediction” MedComm [Under Review]

“Using Supervised and Unsupervised Learning to Predict Life Expectancy and Examine Socioeconomic/Health Predictors” [Pending]
